

# Scenario from another European country

3 notifications to bone establishment of diagnosis of (sporadic) Creutzfeldt Jakob disease in volunteer bone donors, 2 years or more after donation.

- in one case diagnosis confirmed at autopsy
- the other two cases as yet not confirmed
- Processing:
  - 1x cryopreservation
  - 1x fresh ground bone
  - 1x material processed (treated) with 96 other units

What ground is there for taking action re recipients?

What ground is there for taking no action?
